THE SMALL POX AT CALGARY.

A Child Dies of the Dread Disease—Mrs. Belwar not Expected to Live—The Maintenance of the Quarantine Becoming Expensive.

CALGARY, Aug. 9.—The infant child of W. J. Halliday died yesterday of small pox at the quarantine station. Mrs. Belwar, of Shepard, not expected to live. These are the only cases now, and only three people are in quarantine. Mayor Lucas goes to Regina, Wednesday to submit a statement of expenses to the legislature. They will amount to about \$5,000. The mounted police are still patrolling the town, and twelve men came from Regina on Sunday to relieve. They are detained for this duty. It is not likely that there will be another disturbance.

DANGER LESS AT THE COAST.

VANCOUVER, Aug. 9.—The smallpox epidemic in this province is virtually over. The last official report gives the total on the mainland as ten cases, divided as follows:—Vancouver, four in quarantine on Deadman's island, completely isolated from the city proper; New Westminster, three cases, all convalescing and will be discharged in a few days; Hastings, two cases, almost cured; Moodyville, one case, at Jubilee hospital quarantine grounds; Victoria, two miles distant from the business centre, fifty-four cases. No new cases reported for the past week.

HARDENING COPPER.

An Invention That May be Utilized in War Vessels and Also in Cutlery.

QUEBEC, Aug. 8.—About a year ago it was announced that the secret of the lost art of hardening copper and the manufacture of edged tools out of it, equal if not superior to the best steel, had been discovered by a poor blacksmith at Levis, named Allard, but after the first publicity given to the discovery nothing more was heard about it. It now appears that Allard has been at Ottawa and in the United States and that he has received large offers to sell his secret. It is stated that at Ottawa he exhibited specimens of copper tools to Sir John Abbott and Major General Herbert who were both astonished at their edge and hardness also the engineers to whose inspection they were submitted, were impressed with the possibility of the discovery being utilizable for the armoring of war vessels. General Herbert suggested to allow Allard to harden a sheet of copper of 1 1/2 inches in thickness and have its powers of resistance tested at the rifle ranges at St. Joseph de Levis, which seems to have been lately done. When the first bullet was fired against the sheet at forty yards distance it was shattered into a thousand fragments, and the second was completely flattened, but remained imbedded in the copper, which is slightly dinged but did not crack in any way. This result is regarded as very successful.

SIR RICHARD NEAR DROWNING

A Narrow Escape Near Kingston.

KINGSTON, Aug. 7.—On Saturday about noon Sir Richard Cartwright left the city in a skiff to row to his country house on the St. Lawrence, a few miles down. When rounding Point Frederick he was caught in a terrific squall which was accompanied hail and torrents of rain. His boat was capsized and Sir Richard thrown out.

The accident was witnessed by the men of "A" battery at the barracks and Major Drury and Capt. Gaudet hurried to the rescue. Sir Richard clung to the overturned boat tenaciously and was in the water nearly half an hour with the storm beating fiercely about him. He was completely exhausted when rescued.

A PRINCE ALBERT HEIR.

A Northwest Resident falls heir to a Magnificent Fortune.

William Erasmus is a resident of Prince Albert, N. W. T., who until a very brief period ago was entirely unknown to fortune or to fame, but circumstances have lately arisen which alter the case materially and bid fair to dispel the shades of obscurity that have hitherto enveloped his uneventful past, and will place him in a position of affluence and wealth, that will furnish an interesting item for Dan Wiman's commercial reports, and at the same time relieve William of the necessity of "earning his bread by the perspiration of his manly brow," for some time to come at least. Fame he will doubtless achieve in his own peculiar way when basking in the golden rays that promise to shine upon his path in future, or perhaps, not unlike some other rich men who have sense enough to go in when it rains, greatness may be thrust upon him.

Born and reared on the banks of the Red River within a short distance of the city of Winnipeg the subject of these lines, followed with his father and brother the pursuit of agriculture until the date of attaining his majority when seized with the then prevailing spirit, viz. to see life in the west, he packed his tent and packed his belongings in a Red River cart and travelled west and northwards to the then remote Hudson's Bay company's post at Fort A'La Corne and Carleton and here for a time engaged again in farming, varying this occupation at times by freighting, trading and hunting, until the settlement now known as Prince Albert sprang up whence with his small but growing family he removed and has ever since claimed that town as his place of residence.

Unlike old King Miles Mr. Erasmus touch was not to say altogether or always golden and for many years in company with other old timers he shared the toil, privation, and vicissitudes incidental to the life of a north-west pioneer.

Fortune, however, had designated him to be a recipient of her favors and at a time when most appreciable, but least expected. For about a year ago a letter arrived from a firm of lawyers in London, Eng., which occasioned a remarkable but agreeable surprise in the Erasmus household, the purport being that the family had fallen heir to the magnificent fortune of \$750,000 by the death of a relative in the city of Copenhagen, Denmark. The address felt at the unlooked for death of their relative was, however, modified somewhat by the equally unexpected intelligence regarding the fortune. Mr. Erasmus, as may well be imagined, speedily acknowledged this communication and furnished as requested by the London lawyers, many particulars concerning his family history. As usual in these cases considerable time generally elapses before final details can be arranged but a letter has just been received from the lawyers announcing that an agent has been dispatched to Denmark to complete arrangements and the most sanguine expectations are expressed that in a short time the family will be in the full enjoyment of their extraordinary good fortune. A brother Peter, at present teaching school at White Fish Lake, north-west of Edmonton, will be entitled to a portion of the money when received.

Although quite confident of being very soon in an independent position the man upon whom this streak of good luck has descended still continues in the avocation he has of late followed, viz. milling, and may be found any working day at Van Lewen's grist mill, a few miles east of Prince Albert, evidently believing in the moss covered adage "that a bird in the hand is worth"—more than \$750,000 in some one else's hand.

LAWN TENNIS TOURNAMENT.

Seventy-three Events—Result of the Drawing.

Final arrangements in connection with the Lawn Tennis Tournament, which commences on the 29th inst. were made on Tuesday night.

There will be seventy-three events. An entrance fee of 50c. for gentlemen and 25c. for ladies has been fixed. All entries must be paid before playing and the Secretary's receipt submitted to the umpire. The umpire's decision on all points will be final. Events in the final draws will have two umpires and a referee.

The following have been appointed umpires: Messrs. Crosbie, Lang, Calder, Alexander, Hitchcock and Barrett.

The prizes in this tournament will be costly. The challenge cup in the gentlemen's singles, senior, has been donated by Mr. C. W. Milestone, Honorary President of the Club.

The following are the events:—

GENTLEMEN'S SINGLES (JUNIORS)
AUG. 29TH.

Fisher	vs.	Franks
Hitchcock		Christie
Meller		Munn
Milestone		McDonald
Potter		Slater
Robinson		Grant
Rollo		Rutherford

LADIES' SINGLES (JUNIORS) AUG. 30TH.

Potter and Mrs. Robinson	vs.	Hitchcock and Mrs. J. E. Annable
Rollo and Miss Annable	vs.	Fisher and Miss Stevenson

SIR DANIEL WILSON DEAD

The Long Illness of the President of the University of Toronto Terminated at Last.

TORONTO, Aug. 7.—The long illness of Sir Daniel Wilson ended in his death early this morning.

The following biographical sketch is taken from Routledge's biographical summaries: Sir Daniel Wilson, L. L. D., F. R. S. E., was born in Edinburgh, Jan. 5, 1816, and is an elder brother of professor George Wilson, the eminent chemist. He was educated at the University of Edinburgh. In 1847 he published "Memorials of Edinburgh in the Olden Time" illustrated from his own drawings. In 1851 appeared his great work, "The Archaeology and Prehistoric Annals of Scotland" with about 200 illustrations drawn by himself. In 1862 he issued his "Prehistoric Man," researches into the origin of civilization in the old and new world.

His latest works were, "Chatterton, a Biographical Study," 1869; "Calliban, or the Missing Link," 1873; "Spring Wild Flowers," 1875; "Reminiscences," 1878; "Anthropology," 1885; and "Wm. Nelson, a Memoir," 1890. He has been secretary to the Society of Antiquaries of Scotland and was a Fellow of that Society, when in 1853 he was appointed professor of history and English literature in University College, Toronto; and in 1881 succeeded Dr. McCaul in the presidency of the institution. The growth and prosperity of the university has been largely due to his efforts. He was for four years editor of the Journal of the Canadian Institute, and in 1859-60 was president of the Institute. In 1882 he was named by the Marquis of Lorne a vice-president of the literary section of the Royal Society of Canada, and in 1888 was elected its president. In 1888 Her Majesty conferred on him the honor of knighthood.

PASQUA SELECTED.

The Question of the Soo Road Settled Finally.

OTIWA, Aug. 8.—The Regina delegates were introduced to the C. P. R. Board to-day. The visitors urged the necessity of making Regina the terminus of the "Soo" road, and, incidentally, Mr. Van Horna said the Company had determined to go to Pasqua, but he gave a letter reaffirming Sir George Stephen's pledge to bring two south-eastern roads to Regina.

Twenty-eight for the Round Trip.

WINNIPEG, Aug. 10.—Last year the C.P.R. issued tickets to men intending to work in the North West harvest fields at a commuted rate. On presenting a certificate that they had so worked when they wanted to return in the fall, they were given return tickets at a rate which made the fare for the round trip about \$24. This gave the men a chance to spy out the land before returning, or if they desired to remain, to select a permanent location. This year the company has adopted another plan. Tickets are issued to harvest hands at \$28 for the round trip, good for 60 days, no certificate being required.

The Globe is Level Headed on the Immigration Policy.

TORONTO, Aug. 8.—The Globe says editorially this morning that the work of peopling the west must be removed from the old fogey management it has been under for the past decade and that whatever appropriations are made for the purpose must be made effective, not peddled out and wasted in rewards to political hangers. It adds: "New policy, new men, new methods, new ideas, are required, and no more important task demands the consideration of our rulers."

HITCHCOCK & McCULLOCH. BANKERS AND FINANCIAL AGENTS. MOOSE JAW. Agents.—Bank of Montreal. The Moose Jaw Times.

FRIDAY, AUGUST 12, 1892.

PRAIRIE FIRES.

For about a month past extensive prairie fires have been raging throughout the country, south, south-west and west of the Moose Jaw District. The engines on the C. P. Railway have doubtless had to do with the setting out of some of these fires, but they are not by any means chargeable with all of them. Some of them are known to have been caused by the carelessness of travellers, and lightning it is said, and likely with truth, has more than once ignited the dry grass of the prairie.

These fires have done and are doing a enormous amount of injury that is simply incalculable. This subject has been referred to in these columns but no reference to it cannot be made too frequently if thereby anything is done toward the prevention of these devastating fires. We repeat that no one can adequately estimate the amount of damage that is being done by these fires.

There is for one thing the climatic effect—an effect of worst possible character. Drought and hot winds their direct result, and the connection between cause and effect must be in this case apparent to everyone who has eyes to see.

It is difficult to trace the connection between extensive prairie fires to the south and south-west and the hot winds which blew last week, the wind during such days having blown from the south and south-west? To us it is as apparent that two and two make four.

That no one can understand how these fires are destroying what should be, and a few years ago was, the best grazing country to be found anywhere, unless by personal knowledge of it as it was and is he is able to institute a comparison and thus realize the vast injury which has been caused by them. Sloughs that a few years ago furnished hundreds of tons of hay are to-day almost bare, the vegetable mould having been burnt away.

We need not however, make any further comment on this injury. In these and various other ways which are apparent to any observer irrevocable damage is being done to this country.

What then is being done to prevent the setting out of these fires, or to stay their spread over the country at large? The answer is little or nothing. In addition to fire-guarding the lines of the C. P. R.—this may have been done this season, we cannot speak positively in regard to it—much else must be done to prevent them. We believe we are correct in saying that the Agricultural Society of this district made some years ago a representation to the Government urging that, when the snow was off the ground, the Mounted Police be stationed in small detachments over this western country to do patrol duty and to try to keep fires from spreading. Nothing came of it. Indeed in this town for some months past only one member of the force has been stationed and he is of course powerless in the matter.

Here is a great evil. It should have a remedy, the best and speediest that can be devised. We commend the consideration of this very important matter to the various Agricultural Societies, Farmers' Institutes and Boards of Trade, with the hope that they in their united wisdom may devise a remedy for this great evil and secure its proper enforcement.

LAW AND ORDER.

This North-western country has been remarkably free from "mob law." With the exception of a row in Winnipeg over the flogging of a prisoner named Cormack, and the excitement incidental to the railway crossing trouble in 1888 there have been no riots of serious nature.

In Calgary, recently, however, a mob of 500 people made a cowardly assault upon some Chinese inhabitants of that town and committed acts of robbery and violence.

The disgraceful part of the whole proceeding is the fact that the ring-leaders are still at large.

It is to be hoped, in the interests of law and order, that this affair will be ventilated and that an effort will be made to punish the rioters.

The Regina Leader puts the matter very aptly in these words:—

"It behooves every honest citizen of Canada, to be on the watch against any attempt, on the part of the populace to set aside or in any way to disregard the lawfully constituted authority of the Crown, and to speak with no uncertain voice when called upon by the more excitable members of his community to take part in any demonstration that may be to the prejudice of law and order. It has been hitherto our proudest boast that we are free from the incubus of the mob law which is the curse of our American neighbors. Anarchy and confusion with consequent insecurity of life and property will quickly follow any attempt on our part to make light of our duties as men and citizens, and Canada from being a land of safety, freedom and good order, will become a mere chaos of unguided, unregulated anarchy."

MASONIC CHARITY.

The well known charity of the Masonic Order was exhibited in Medicine Hat the other day. A poor widow with four small children arrived from Winnipeg on her way to Butte, Mont., in destitute circumstances. In her dilemma she called on W. T. Finlay, master of the lodge there, who at once made provision for her journey to Butte. Supt. Niblock also very kindly used his influence with Supt. Barclay of the Galt road, to get reduced fare tickets for the travellers. The lady's husband, who was a member of the Masonic Order, died in Calgary a few weeks ago and the Masons of that town supplied funds for her to get to Winnipeg, where she expected to meet her brother-in-law, but he had gone on to Butte, hence her return here. Those who are in the habit of railing against secret societies and the Masonic society in particular, should take note of such truly charitable acts. How often do the churches do as much for their destitute brothers and sisters.

EDITORIAL NOTES.

Japanese auctions are silent. Each bidder writes his name and bid upon a slip of paper, which he places in a box. The box is opened by the auctioneer and the goods declared the property of the highest bidder.

The condition of Main St. from High to River Sts is not conducive to comfortable driving. As it now is it is showers of rain such as we had on Tuesday, leave the street in a very undesirable condition. The street should be graded and left in a workmanlike manner.

The other day Mr. Van Horne was asked by a Montreal Star Reporter where the Northern terminus of the "Soo" Road would be. He answered that he did not know as he had not yet seen Messrs J. Smith and G. T. Marsh the Board of trade delegates sent from Regina.

The bountiful rain last Tuesday will be of great benefit in assisting the filling process in the grain crop. The prospects now are that there will be a good yield in this district which, although not equal to the phenomenal crop of last season, will make the hearts of the farmers rejoice. With a good crop in the surrounding district, and the advent of the "Soo" road, our town will enter in an era of prosperity unparalleled in its history. Moose Jaw is all right.

The sales of English wheat at the statute markets since harvest amount to 2,863,000 qrs as compared with 3,244,000 qrs last year and 3,096,000 qrs in the season before last. If the sales had been heavy at the local exchange instead of being light, it is curious to imagine what the average would have been by this time seeing that it is, even as things go, down to 29s 3d or 29s 6d below the level of this time last year. Of course it is the imported wheat which has played all this mischief with English prices. Hardly the English wheat required to be supplemented by all the foreign wheat which we have received. The depression is directly due to the immense imports of foreign flour which have penetrated into every country and undersold the farmer in sight of his own homestead.—Mark Lane Express.

A TERRITORIAL EXHIBIT AT THE WORLD'S FAIR.

The following letter has been received by the Moose Jaw Agricultural Society:—

Mr. Hamilton Lang,
Secy. Moose Jaw Agricultural Society.
Sir:

The enclosed circular sent out by the Regina Agricultural Society will speak for itself. Arrangements are being made here for sending out a Circular on the World's Fair which will contain full information.

In the meantime steps should be taken at once to secure samples of grain, shafts of grain, specimens of native grasses, fruits etc, and I would ask your cooperation in this work. We must depend to a large extent on the voluntary work of Agricultural Societies, Boards of Trade, Local Members and private individuals, and I think we are fairly local to those organizations and individuals to do all they can to procure a good North West Exhibit. Will you kindly try and secure the interest and work of Agricultural Societies, Boards of Trade and the people of your District generally towards the attainment of this end. As you see, there is really no expense to be incurred. The Dominion authorities supply all transport etc, so that all we have to do is to secure exhibits and have them securely packed and put on board the train.

All exhibits must be sent to the Experimental Farm, Indian Head, Assn., where they will be stored.

Exhibitors will be given in exchange for their exhibits during the coming week, but I write to you now in order to ask you to try and have immediate action taken in some necessary directions.

I am
Sir
Your obedient Servant
F. W. G. Haultain.

We beg to inform you it is intended that a North West Exhibit shall be prepared for the Columbian Exposition at Chicago next year, which shall show in the fullest possible manner the immense resources of our great country.

It therefore becomes the duty of our Agriculturists to select the forthcoming harvest, their finest samples of the various kinds of grain, say from 10 to 20th of each, which should be labelled with the name of the Producer location, P. O. address nature of soil, when sown quantity of seed per acre and weight per bushel.

A large number of sheaves of grain will also be required for the purpose of forming a North West grain trophy which it is intended to erect in the main entrance of the exposition. Such sheaves to be of oats, barley and wheat in the proportion of three each of the first named to one each of the latter. They should be on the green side in order that the grain may not shake out. The straw should also be dried under cover before being tied up.

The sheaves should be from four to six inches in diameter and the heads should be formed into a pyramid or cone shape.

Specimens of grasses of various kinds in bunches will also be needed, some of the prairie grasses should be prepared at the earliest date before they become dried down.

Samples of the various roots will also be required. These it is intended shall be shipped to Chicago the coming fall, where they will be kept in cold storage until the opening of the Exposition in May next.

Specimens of all kinds of native and

cultivated fruits and berries are also required which may be sent in dried or preserved in tightly sealed bottles of coal oil, which is one of the best known mediums for keeping them in their natural shape and color.

Exhibits of wool will also be received to consist of one fleece in the natural condition taken from the animal. Exhibits to be neatly folded and secured against injury in handling.

Samples of honey should also be sent in.

The ladies are also invited to forward samples of needle and fancy work, which will be carefully judged by a lady at Ottawa who holds a certificate of proficiency in needle work from the South Kensington School of Art, London, England.

All specimens will be placed in glass cases to preserve them from injury and will be duly returned to their owners.

All articles exhibited at Chicago will be labelled with the name and address of producer so that each one may get due credit for their labor. All cereals will be shown in glass bottles, to be supplied by the Dominion authorities at Chicago, bearing name of grower etc.

Prizes will be awarded according to merit and will consist of gold, silver and bronze medals and diplomas.

During the Summer samples of vegetables will be sent down periodically by express for exhibition so that the capabilities of the North West may be fully and practically demonstrated.

All freight and transport charges will be borne by the Dominion Government.

Live stock of the highest grade may also be entered. Stock will be showed various dates about three each class.

The prizes range from \$150 to \$25 in each class of stock.

This will be the one opportunity of a Century for advertising the vast resources of the North West Territories to the millions of people who will visit the exposition.

Each one should therefore regard it as a duty to assist in preparing an exhibit worthy of the country in which we live.

CARON SIFTINGS.

Hay-making is the order of the day in Caron.

As the school-house is used for church service it would be well if there were some posts set out to tie the horses to, so as not have boards torn off by tying horses to them and not have windows broken by tying horses too close.

Quite a number of the Caron young people took in the picnic at Buffalo Lake last Wednesday.

It is considered good manners (is it not Mr. Editor) to refrain from whispering during church service. It would be well if some people would remember this.

Mr. S. Flack, of St. Joseph Island, is visiting his brother-in-law, Mr. C. Colenutt, and at the same time looking over the country with the intention of taking up a homestead in this neighborhood.

FRIDAY, AUGUST 12, 1892.

FROM WINNIPEG TO MOOSE
JAW.

Extracts from a Drummer's Note
Book.

III

It was a long weary run from Broadview to Balgonie but at last I saw the brakeman come to the end of the sleeper and separated the bell-cord. I knew what that meant. Then the engine sent out its ear-splitting, ghostly wail. I knew what that meant also. We were close to Balgonie.

The train stopped. Yes, there on the side track was the dining-car. I made out the name: it was the "Sandringham." On the platform stood the cook—white aproned and clean.

"I am laying for you, my friend!" I said to myself.

The forward section of the train pulled away, leaving the Pullman standing, and presently glided down the siding and the dining was completed on. Soon she backed down and we were once more moving. I got interested for the moment in the bustle and hurry of the porter as he tidied up his car and shaped things for the day.

"Breakfast is now ready in the —"
I did not wait for the conclusion of the sentence. I made a wild break for the car, seated myself and watched proceedings.

The car was the picture of order and cleanliness. The tables were neatly laid and the linen as white as the driven snow. The conductor was entirely master of the situation. He pointed out convenient seats to the passengers, dexterously avoided any crush, and when all were seated he turned the waiters loose upon us and the trouble commenced.

I gave my order to the waiter—a little Scotchman as quick as a steel trap. I ordered beefsteak. Now I am partial to beefsteak. Not the kind that they have in professional boarding-houses, recollect. Not the thick grease-smeared, half warmed leathery steak that sometimes falls to the lot of poor struggling mortals, but a—

Oh, well—Fancy a lonely pilgrim sitting in half-expectancy of such a dish: (for had not the English "what-is-it" the last car "beastly") and then endeavor to comprehend the measure of my joy and satisfaction when the waiter returned and set my breakfast within the focus of my delighted vision.

First came a large, thick, juicy sirloin steak sputtering from the grill, and the whole decked out with parsley. Then a generous dish of browned potatoes, hot, crisp and enticing.

It didn't take me long to get outside of that steak, and while my waiter brought me my next order I looked about the car. Sure enough, there were Charley and his father. The old man couldn't find fault with the steak. Even he, rude, selfish and exacting as he was, had no kick coming to him on that score, but I heard him say: "Charley, I wouldn't eat any of the better, don't you know, because, you know, the better the butter in the other car was 'beastly'; and of course, you know, this must be the same."

I am a man who believes that all things have been created for a wise purpose, but I was sorely at a loss to divine what purpose this unique specimen could possibly serve. The waiter brought me some hot rolls, a plate of buckwheat flap-jacks, piping hot and due to the delicate brown of perfection, a jug of genuine maple syrup, a cup of coffee, and a tiny pitcher of cream.

It is not, O reader, the quantity of a man's food that tells, it is the quality, and the environment. Did you ever sit down to a hotel breakfast to find the table slovenly,

and the linen soiled, and have the waitress ask you in a voice, snapping and ill-humored, if you would have porridge? Have you ever noticed how much a neat table and a pleasant "good-morning" will do towards an enjoyable breakfast? And further, have you ever noticed that when you rise from the table full but not satisfied, having had the exercise of a good deal of muscle and not a little temper, your frame of mind will influence your whole day?

The converse is equally true for when I finished this breakfast of breakfasts, and sought the smoker once more, blissful waves of supreme satisfaction rolled over my spirit.

GENERAL NOTES.

In the story of Sir Charles Eann Smith's ride to Fez, the newspaper correspondent who accompanied the mission figures so prominently that he has become the lion of London. After the escape from Fez the reporter struck out across the desert alone, and so successful was his little personally conducted adventure that he arrived in Tangier six days before Sir Charles and his despatches had become history, before the diplomatic narrative had yet reached the Foreign office. The newspaper gospel of "Get there" was thus so brilliantly demonstrated that Lord Salisbury sent for the reporter and had a long interview with him.

The British Consul at Santos, in Brazil in his last report gives a number of reasons for the failure and misfortunes of recent British emigrants to Brazil:—(1.) The Brazilian agents sent to recruit labor in Europe extended their operations to Great Britain, though instructed to confine them to Latin races. (2.) Though instructed to recruit agricultural labor only, and receiving a commission for each emigrant engaged, they eventually registered any individual who said he was an agriculturist. (3.) The bulk of the British emigrants engaged were consequently mill hands and people of no occupation from the manufacturing towns, who would have failed anywhere as agriculturists, even in the British colony. (4.) The emigrants were deceived and deceived themselves as to the nature of the work required of them, the food they were to receive, and the value of money in Brazil. (5.) Their habits were totally unsuited to a tropic climate, so that many felt sick at the outset. (6.) They could not speak or understand a word of the language.

"Come See."

Mr. Simon Duck of Victoria, B. C., is a seventh son of a seventh son. In 1868 he left London on the seventh day of the seventh month and arrived in this country on the seventh day of the following month at 7 o'clock in the morning. When he put up his name for member of the British Columbian parliament he was elected by a majority of exactly seven votes. At the election following he was defeated by the same mythical number.

Round Shoulders.

One of the most frequent deformities against which women must continually fight, especially mothers with young children, is that of round shoulders and stooping figure. Just observe how many such there are in any gathering. Even the best natural figures will often show this tendency unless some care is taken to prevent it, especially if their work is of such a nature as to keep them sitting at a desk all day, bending over a machine, or doing many kinds of household work; while thin, narrow-chested women are very likely to stoop before middle age.

Teachers of physical culture say this may be entirely rectified by a very simple and easily performed exercise, that of raising one's self upon the toes leisurely in a perpendicular position several times daily. To do this properly, one must be in a perfectly upright position, with the heels together and the toes at an angle of 45 degrees, dropping the arms by the side. Inflating and raising the chest to its full capacity is a part of the exercise, a process which the lungs soon begin to show.

To exercise all the muscles of the legs and body one must rise very slowly on the balls of both feet to the greatest possible height and then come again into standing position without swaying the body out of its perpendicular line. This will be the most difficult part of the exercise, but may be accomplished by patience and perseverance. After a while the same be tried first on one foot and then on the other.

In order to prevent round shoulders in school children teachers should never ask them to fold their arms in front, but rather to place them behind the back, which occasionally is good practice, giving as it does the fullest expansion of the upper part of the body. For this reason more care is taken now than formerly to see that children sit properly, with the spine kept straight and chest expanded.

TO RENT.

Comfortable dwelling-house in town to rent. Apply to—

Cheap Reading for Farmers.

We have made arrangements by which we are enabled to offer THE NOR' WEST FARMER in conjunction with our own paper at a greatly reduced rate. THE NOR' WEST FARMER, which was established in 1882, is still the only agricultural paper printed between Lake Superior and the Pacific Coast, having in that vast territory a much larger circulation than all other agricultural publications combined.

It is an illustrated paper, devoted to Live Stock, Dairying, Veterinary, Grain Growing, Poultry, Forestry, Gardening and every other detail of Northwest Farming, written by practical, experienced men of long residence here, and is specially adapted to the conditions of this region, to the farming of which it is the only paper in Canada exclusively devoted. Complete and accurate market reports are among its special features.

It is a journal that should be read by every man cultivating an acre of land, or owning a domestic animal in Manitoba or the Northwest Territories. As its name implies, it is edited especially to meet the requirements of the Great Fertile Belt of the Northwest. It is alike valuable to the Farmer, Rancher, Dairyman or Gardener.

The MOOSE JAW TIMES (subscription \$1.50 a year) and THE NOR' WEST FARMER (subscription \$1 a year) will be sent to any address, for one year, on receipt of \$2.00, a saving of 50 cts., being thus effected on the price of two papers.

The Moose Jaw Times.

FRIDAY, AUGUST 12, 1892.

LOCAL AND GENERAL NEWS.

Does your arm itch?
The "Soo" is coming.
C. P. R. picnic to-morrow
Conductor A. Holdsworth is now
running out of Moose Jaw.

Mr. Marsh, of Toronto has been the
guest of Mr. T. B. Baker this week.

Mr. H. McDougall has nearly com-
pleted the brick of Russell Hall.

Mr. J. N. McDonald of the Virden
Chronicle paid us a fraternal visit on
Monday.

Tenders are once more being ad-
vertised for the Moose Jaw Court
House.

Mr. T. W. Robinson returned from
his visit to Trent Bros. Ranch last
evening.

The close season ceases on Monday
next. Go to Meller's for sportsmen's
sundries.

Reports from the country state that
the wheat is in fair shape, well headed
and filling nicely.

On Thursday Mr. R. C. McDonald
received a large consignment of fruit
for the picnic to-morrow.

To-day's Canada Gazette contains the
appointment of Judges Tait and Routh-
ier to investigate the charges against
Sir A. P. Caron.

The shooting season for geese and
ducks will open on August 15th.
Already several shooting parties have
been arranged. The season promises
to be good.

W. D. Palmer, River St. East, sole
agent for the Karn Organ. Received
highest award and latest medal over
all manufactures in Canada. Heintze
man Pianos, Raymond Sewing Machine
Needles on hand. Oils a specialty.

During the month of July Massey-
Harris Co. shipped from their factories
over 10,000 machines. Their foreign
shipments alone during last month
alone amounted to 294 cars.

Recently President Van Horne was
asked by a Montreal reporter if there
was any truth in the statement that
the C. P. R. company was about to build
a large hotel in Toronto. His reply
was:—"You can say that there is no
truth in the report at present."

Staff Capt. and Mrs. Bolton, Chief
Officer in command of the Social re-
form Branch of the Salvation Army in
Canada, will hold a meeting in the
Methodist Church, Moose Jaw, on
Monday Aug. 15th. Every one who
has any interest in the salvation of
the poor and out-cast should be at
this meeting. The Staff Captain will
be able to tell what has been and is
being done in our large cities for them.
Meeting will commence at 8 P. M.
All will be welcomed.

What might have proved a bad con-
flagration occurred on Saturday night.
An alarm of fire was raised about 21.15.
The roof of the new building now be-
ing erected by Mrs. McFall was ablaze.
The fire brigade were promptly on
hand and had the Chemical on the
spot on less than three minutes from
the time the alarm was first given.
The fire, however, was under control
before the engine arrived. A strong
northwesterly gale was blowing at the
time and had the blaze not been
promptly extinguished, Moose Jaw
would in all probability have suffered
a third time from the fire fiend.

The quarantine on ducks and geese
will be lifted on August 15th.

The annual picnic in connection
with the Methodist Church took place
in the grove on the river on Wednesday
afternoon.

Rev. A. J. McLeod, Principal of the
Industrial School, Regina, will preach
morning and evening in the Presbyter-
ian Church on Sunday next.

Mr. R. G. Matthews, of the Macleod
Gazette says in his salutatory, after
mentioning that the paper will continue
independent in politics, "There are one
or two questions, burning ones at that to
Macleod citizens, which it is impossible
for a paper which calls itself a repre-
sentative one, and which voices the
people's opinion, to shrink in any way.
However, I have no intention of rushing
into matters like a furious tornado,
literally tearing everything up by the
roots, creating general chaos; but
rather to lay low for a while and allow
what comes my way gently and peace-
fully."

The Quebec Official Gazette con-
tains a notice that H. P. Dwight, of
Toronto, president of the Great North
Western Telegraph company; F. Key-
er, of the same place, merchant; W.
Wainwright, of Montreal, assistant
general manager of the Grand Trunk
Railway company; F. H. Waycott, of
the same place, manager, and G. B.
Perry, of Toronto, intend to apply to
the Lieutenant Governor of the
province for incorporation by letters
patent for the purpose of carrying on
a general telegraphic business in the
province under the name of the Anglo
Provincial Telegraph company, with
a capital stock of \$25,000, divided
into 250 shares of \$100 each. The
chief place of business of the company
will be in the city of Montreal.

AGRICULTURAL SOCIETY.

Driving, 1 Mrs Cline; Saddle Pony,
1 Wm Walsh; Pony Mare with Foal
at foot, 1 E Colpitts.

The remainder of the list will be
published next week.

They Like the C. P. R.

The delegation of Michigan farmers
who have been inspecting lands in the
North West, conclude their report in
these words:—"We cannot conclude
our report without thanking the C.P.R.
and its officials for its kindness and at-
tention to us. We had a colonization
sleeper from Winnipeg to Edmonton
and return. Mr. Niblock, assistant
superintendent, Medicine Hat, was
very kind and attentive to us. The
Manitoba one of the C.P.R. steamers
that run into Fort William, on which
travelled, is one of the best we ever saw;
in short we may say that the Canadian
people and officials wherever we met
them were very attentive and accom-
modating to us."

The Fox Concert Company.

This company, as advertised in last
issue, appeared in Moose Jaw on
Friday and Saturday nights last.

The concert was by far the best that
has ever been presented in town.
Mr. James Fox, who has an
eastern reputation as a comic singer
was the feature of both nights. His
character songs were always received
with uproarious applause. We might
mention as special favorites: "The
Ship that Carried Me Over," "Punct-
uation," "Slattery's Light Dragons"
and "The Irish Jaunting Car."

Mr. J. H. Cameron kept the audi-
ence roaring in his comic songs and re-
citations. He certainly has learned the
art of making people laugh. In "A
Boy's Essay on Necks," "Trouble in the
Amen Corner," and several other re-
citations, Mr. Cameron displayed a
remarkable power as an elocutionist.
His songs were well received.

Miss Lili Kleiser captivated the
audience by her modest, unassuming
appearance. Her purity of tone and
clearness of enunciation rendered listen-
ing to her an unusual treat. It is im-
possible to mention any selection par-
ticularly, as all were so good. The
audience was fairly carried away with
"Annie Laurie."

The company are fortunate in secur-
ing the services of Miss Martin who is
one of the best pianists in Canada.

MISS McDONALD, TEACHER OF ORGAN
and Piano. Instruments for practice
Residence—River Street.

J. W. BRADSHAW, Contractor and
Builder.—Sheds and Doors made to or-
der on short notice.
